

## Porta Futuro

# Solution

To create an aggregator capable of effectively mobilising resources, information, skills, and opportunities to promote autonomy, social innovation, and local development. This aggregator will combine both public and private entities in providing guidance and support services to the labour market. Furthermore, the community will foster constant networking among stakeholders in the labour market.

## Objectives

To provide appropriate guidance to metropolitan users concerning the labour market. This effort specifically focuses on the youth universe and aims to facilitate their matching with the existing supply system. Additionally, the organisation aims to enhance social and working inclusion within the metropolitan territory and encourage communication between institutions and stakeholders to promote horizontal local development.

## Impact

**Better access to information for guidance for end users**

**Better cooperation between stakeholders in the territory**

## Key words

**Integration between public and private;**

**Network**

**Stakeholders;**

**Development of the metropolitan area.**
